## PROFESSIONAL SUMMARY

Motivated and self-driven web developer and electrical engineering student with hands-on experience building websites, web applications, and digital business ideas. Passionate about creating modern, user-friendly, and problem-solving digital products while continuously learning new technologies and improving technical skills. Skilled in frontend development, responsive design, JavaScript fundamentals, and building practical projects from concept to deployment. Looking for internship, junior, or freelance opportunities where I can contribute, grow, and gain real-world experience.

---

## TECHNICAL SKILLS

### Frontend Development

- HTML5
- CSS3
- JavaScript

### Tools & Technologies

- Git & GitHub
- VS Code
- Figma
- Vercel

### Other Skills

- Problem Solving
  - Communication
  - Team Collaboration
  - Fast Learner
  - Time Management
-

# EDUCATION

## Diploma in Electrical Engineering

Kabete National Polytechnic — Nairobi, Kenya  
Expected Graduation: 2026

Relevant Areas of Study:

- Electrical Installation
  - Digital Electronics
  - Circuit Analysis
  - Engineering Mathematics
  - Technical Drawing
- 

# EXPERIENCE

## Freelance Web Developer

Self-Employed | Remote  
2026 – Present

- Designed responsive websites for practice, learning, and portfolio development.
  - Built frontend interfaces focused on usability and clean design.
  - Learned modern development workflows and version control.
  - Researched UI inspiration and transformed designs into working websites.
  - Continuously improved coding skills through practical projects.
- 

# ACHIEVEMENTS & INTERESTS

- Passionate about solving real-world problems using technology.
  - Interested in web development, software engineering, and entrepreneurship.
  - Actively learning modern frontend development and software systems.
  - Building personal projects and digital platforms.
  - Interested in electrical systems, electronics, and software integration.
